REASONS FOR ALLOWANCE

The following is an examiner's statement of reasons for allowance: the independently claimed invention with the features of a bypass disposed in a drum casing at the introduction region for conveying air, a fan providing a vacuum in a shaft in sealing connection with an outlet end and configured to receive a pourable material from a rotary drum, a combustion apparatus emitting smoke gases through the rotary drum concurrently with the pourable material from the rotary drum, and a Venturi fitting disposed coaxially in the rotary drum upstream an outlet end represents a non-obvious improvement over the closest prior art Culp et al. (US 6,219,937). Other prior art references cited in this action contain features claimed by the applicant, but are not considered to have sufficient motivation to combine those teachings with the closest prior art reference.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Stephen Gravini whose telephone number is 703 308 7570. The examiner can normally be reached on normal weekday business hours (east coast time).
